

Justin Musick

Senior Java & Full-Stack Software Engineer

Sandusky, Ohio | 419-357-7624 | justin.musick@gmail.com | justinmusick.com | github.com/jmusick | linkedin.com/in/jdmusick

PROFESSIONAL SUMMARY

Senior hands-on Java and full-stack software engineer with extensive experience modernizing enterprise healthcare platforms, building secure customer-facing and internal applications, and translating business needs into scalable solutions. Supports systems used by thousands of users and more than 20 configurable portals serving millions. Brings peer code-review experience and an earlier record of building IT service divisions, managing technical staff, and partnering directly with company leadership.

CORE TECHNOLOGIES

Languages & frameworks: Java, Spring, Struts, JavaScript, TypeScript, React, Astro, JSP, Jinja, HTML, CSS, Bootstrap, jQuery, PHP, Python, Lua

Data & platforms: REST APIs, SQL, D1, PostgreSQL, MySQL, MS SQL, Cloudflare Pages & Workers, AWS, Azure, AEM, Kentico, Joomla, WordPress

PROFESSIONAL EXPERIENCE

Associate Software Engineer

Optum, Inc. (UnitedHealth Group) | May 2024 - Present | Remote

- Develop and maintain full-stack healthcare applications serving thousands of users with Java, Spring, Struts, JSP/Jinja, JavaScript, Bootstrap, jQuery, CSS, and REST services.
- Modernize WebExchange and IWS across backend and UI layers, including workflow configuration, document indexing, OCR processing, and configurable security rules used by dozens of departments.
- Develop and support 20+ configurable Optum Adaptive Platform portals serving millions of users across UMR, NYC, GEHA, and other clients and lines of business.
- Refactored WebExchange for a new Network Provider Services unit, adapting architecture to new workflows, business rules, and compliance requirements.
- Implement role-based access controls and security validations for HIPAA-regulated systems and enterprise data-protection requirements.
- Perform peer code reviews and collaborate with QA, business analysts, developers, and stakeholders to deliver production-ready solutions.

Web Developer

Centene Corporation | May 2019 - May 2024 | Remote

- Developed and supported WebExchange and IWS after Centene's acquisition of HealthSmart, delivering Java features, bug fixes, and maintainability improvements.
- Upgraded legacy interfaces to modern UI frameworks and improved front-end and back-end maintainability, usability, and reliability.
- Partnered with cross-functional teams to align enterprise healthcare administration platforms with evolving business and regulatory requirements.

Application Developer / Web Developer

HealthSmart | July 2014 - May 2019 | Remote

- Transitioned from web development into Java application development for WebExchange and IWS, contributing feature enhancements, bug fixes, and ongoing support.
- Improved enterprise interfaces with HTML, CSS, and JavaScript and collaborated across business and technical teams on client-driven enhancements.
- Partnered with marketing to launch a redesigned HealthSmart.com on Kentico and maintained commercial sites across multiple divisions.

Website Administrator / Web Developer

Commerce Benefits Group | October 2012 - July 2014 | Avon Lake, Ohio

- Led the redesign and optimization of MDLabTests.com using Joomla, PHP, JavaScript, CSS, custom templates, and e-commerce integrations, helping sustain approximately 20% annual online-sales growth.
- Launched and managed approximately a dozen commercial websites, portals, and internal systems while owning SEO, analytics, digital advertising, email marketing, and leadership reporting.

EARLIER LEADERSHIP & IT EXPERIENCE

IT Manager

RestorePro, Inc. | September 2009 - November 2011 | Sandusky, Ohio

- Centralized IT operations previously handled by outside vendors; managed PCs, servers, networks, cloud migration, CRM implementation, websites, and digital marketing.

IT Manager

Accurate Business Machines | March 2008 - September 2009 | Sandusky, Ohio

- Launched an IT services division and grew its client base from zero to dozens of customers by delivering repair, networks, hosting, email, websites, and custom applications.

IT Manager

HMC, Ltd | October 2004 - September 2007 | Bellevue, Ohio

- Managed and mentored three internet support technicians, provided escalation support, and worked directly with the company president to launch HMC Tech managed IT services and support broadband growth.

Internet Specialist / IT

RS Office Solutions | July 2002 - October 2004 | Sandusky, Ohio

- Helped launch an IT services division and delivered business email, web hosting, servers, networks, hardware deployment, and client-facing technical support.

Internet Support Technician

Advanced Computer Connections | December 1999 - July 2002 | Norwalk, Ohio

- Supported dial-up and early wireless broadband customers, administered ISP and hosting accounts, assisted with infrastructure, and built foundational web development experience.

SELECTED PROJECTS

Tagstash - Designed and built an end-to-end, multi-user bookmarking application with active users, including the D1 data model, React interface, Cloudflare Workers APIs, browser extension, email verification, and Stripe subscription system. [tagsta.sh](#) | [repository](#)

The Hidden Lodge Platform - Built an Astro/TypeScript application on Cloudflare Pages and Workers with D1, Blizzard OAuth and APIs, authenticated REST endpoints, scheduled roster and analytics refreshes, a Python desktop bridge, and a Lua WoW addon that syncs preparedness, attendance, Great Vault, upgrade, and loot-history data.
