SUMMARY

Technology leader and full-stack application developer with extensive experience spanning ISP operations, infrastructure management, web development, and enterprise healthcare systems. Proven track record of launching and growing IT service divisions, modernizing legacy platforms, and driving digital transformation initiatives. Combines hands-on expertise in Java and web technologies with strategic business insight, delivering scalable solutions that improve performance, user experience, and organizational growth.

EXPERIENCE

Associate Software Engineer

Optum, Inc. (a subsidiary of UnitedHealthcare)

May 2024 - Present, Remote

- Developed and maintained full-stack, customer-facing healthcare web applications using **Java (Struts, Spring)** and **JavaScript/CSS (Bootstrap, jQuery)**.
- Contributed to **WebExchange**, a secure client portal enabling members to view medical claims, track deductibles, request documentation, and file disputes.
- Led backend and UI enhancements for **IWS (Internal Workflow System)**, a multi-department document workflow platform supporting dynamic workflow configuration, document indexing, OCR processing, and a customizable security rule engine.
- Refactored and forked WebExchange to support a new Network Provider Services unit under HealthSmart, adapting system architecture to accommodate new business rules, workflows, and compliance requirements.
- Designed and implemented configurable role-based access controls and security validations to meet strict enterprise security standards.
- Ensured all applications adhered to **HIPAA** compliance guidelines and enterprise-level data protection requirements.
- Collaborated with QA, business analysts, and stakeholders across departments to deliver secure, production-ready healthcare solutions.

Web Developer

Centene Corporation

May 2019 - May 2024, Remote

- Continued development and support of proprietary TPA platforms **WebExchange** and **IWS** following acquisition of HealthSmart.
- Expanded Java and backend development expertise, contributing to system enhancements, performance improvements, and long-term maintainability.
- Modernized front-end and back-end technologies to improve scalability, usability, and system reliability.
- Collaborated with cross-functional teams to align platform capabilities with evolving business and regulatory requirements.
- Contributed to ongoing evolution of enterprise-level healthcare administration systems supporting large client populations.

Application Developer / Web Developer

HealthSmart

July 2014 - May 2019, Remote

- Transitioned into application development following acquisition of Commerce Benefits Group, supporting proprietary TPA platforms **WebExchange** and **IWS**.
- Expanded technical skillset to include Java, contributing to bug fixes, feature enhancements, and ongoing platform support.
- Applied front-end expertise (HTML, CSS, JavaScript) to improve usability and interface consistency across enterprise systems.
- Collaborated with cross-functional teams to deliver enhancements aligned with business and client requirements.
- Partnered with the marketing department to develop and launch a redesigned HealthSmart.com using an updated Kentico CMS platform.
- Launched and maintained additional commercial websites supporting various HealthSmart divisions and product lines.

Website Administrator/Web Developer

Commerce Benefits Group

October 2012 - July 2014, Avon Lake, OH

- Led development and optimization of MDLabTests.com, significantly increasing online sales through improved UX, performance, and conversion strategy.
- Modernized front-end design with a full visual overhaul using Joomla CMS, PHP, JavaScript, CSS, and custom templating with a customized shopping cart system.
- Launched and managed multiple commercial websites supporting various business divisions.
- Managed SEO strategy, social media presence, analytics, and digital advertising to drive traffic and revenue growth.
- Executed email marketing campaigns and tracked performance metrics to support customer acquisition and retention.
- Generated business intelligence reports for ownership to support strategic decision-making.
- Gained experience with in-house TPA systems (WebExchange and IWS), supporting integration between public-facing platforms and internal operations.

IT Manager

RestorePro, Inc.

September 2009 - November 2011, Sandusky, OH

- Managed and centralized IT operations for a growing disaster restoration company, replacing outsourced vendor support.

- Maintained all PC hardware, servers, and networking infrastructure to ensure reliable internal IT operations.
- Successfully oversaw migration to cloud-based solutions, improving accessibility, scalability, and disaster recovery.
- Led migration to a new customer service/CRM system, streamlining workflows and client management.
- Developed and maintained multiple commercial websites across company divisions.
- Managed social media channels and marketing initiatives, including print materials, email campaigns, and analytics.
- Improved operational efficiency and strengthened the company's digital presence through integrated IT and marketing strategies.

IT Manager

Accurate Business Machines

March 2008 – September 2009, Sandusky, OH

- Launched and expanded a new IT services division for a traditional office equipment provider.
- Designed and implemented services including PC repair, network design, website development and hosting, email solutions, and custom web applications.
- Built a client base for IT services, helping the company transition from equipment sales to technology solutions.
- Managed projects end-to-end, ensuring timely delivery and high client satisfaction.
- Leveraged prior ISP and business IT experience to guide service offerings and technical strategy.

IT Manager

HMC, Ltd

October 2004 – September 2007, Bellevue, OH

- Managed and mentored a team of Internet Support Technicians, providing escalation support and technical guidance.
- Oversaw daily support operations to ensure timely resolution of connectivity and service issues.
- Partnered with ownership to develop and launch **HMC Tech**, expanding into managed IT services for local businesses.
- Helped transition the company from primarily dial-up internet services to broadband offerings.
- Contributed to service expansion, infrastructure improvements, and long-term growth strategy.

Internet Specialist/IT

RS Office Solutions (formerly RS Business Machines)

July 2002 – October 2004, Sandusky, OH

- Helped launch and grow the company's IT services division within a traditional office equipment business.
- Implemented business email, website hosting, and small-scale server solutions for local clients.
- Configured and maintained servers supporting client services and internal operations.
- Delivered on-site IT support, troubleshooting hardware, networking, and workstation issues.
- Installed and configured PCs, printers, scanners, and network equipment in business environments.
- Partnered with sales to identify client technology needs and deliver practical IT solutions.

Internet Support Technician

Advanced Computer Connections

December 1999 – July 2002, Norwalk, OH

- Provided phone-based technical support for dial-up and early wireless broadband customers, troubleshooting connectivity, email, and internet configuration issues.
- Diagnosed and resolved TCP/IP, modem, browser, and client-side email problems for residential and small business users.
- Managed ISP account administration including user provisioning, password resets, and service configuration.
- Set up and maintained website hosting accounts and domain-related services.
- Assisted with ISP infrastructure maintenance and general service reliability support.
- Developed foundational web design and development skills; completed small website projects for local clients.
- Delivered clear, non-technical guidance to customers, improving issue resolution time and customer satisfaction.
